KS2 Progress Measures

The new progress measures are a type of value added measure which means that pupils' results are compared to the actual achievement of other pupils nationally with similar prior attainment. The progress measure comes in the form of a scaled score and a school progress score. Scaled scores are reported between 80 and 120, with 100 being the national standard.

Progress scores are for the school only, not individual pupils. A score of 0 means that pupils in the school on average do as well in KS2 as those with similar starting points nationally. A positive score means pupils do better. A negative score does not mean that pupils did not make any progress, rather it means they made less progress than other pupils nationally with similar starting points.
